

Created a network graph and with following features into the graph:

Red Line – High traffic

When traffic is greater than 1.5 of average traffic

Yellow line – Medium traffic

When traffic is greater than average traffic

Green Line – Normal Traffic

Otherwise

Reload Data (Button) – It fetches new data and render graph again.

Circle – it is either source or target node.

Legend (On the left-hand side) – It indicates type of source or destination node.

Line – It represents connection between source and destination node.

Tooltip – On each line there is tooltip indicates source and destination node and traffic and packets between them.
